Wireshark Filter Cheat Sheet

Display Filters · Quick Reference Guide

Wireshark Filter Cheat Sheet

Practical reference · Network traffic analysis · SOC · Cybersecurity

IP FILTERS

<code>ip.addr == 1.1.1.1</code>	IP traffic to or from 1.1.1.1
<code>ip.src == 1.1.1.1</code>	IP traffic from 1.1.1.1
<code>ip.dst == 1.1.1.1</code>	IP traffic to 1.1.1.1

TCP FILTERS

<code>tcp.port == 80 443 22</code>	HTTP, HTTPS or SSH traffic
<code>tcp.srcport</code>	TCP source port (ephemeral)
<code>tcp.dstport == 80</code>	TCP destination port 80
<code>tcp.flags.syn == 1</code>	SYN packets — connection start
<code>tcp.flags.ack == 1</code>	ACK packets
<code>tcp.flags.syn==1 && ack==0</code>	SYN only, no ACK
<code>tcp.flags.fin == 1</code>	FIN packets — connection end
<code>tcp.analysis.retransmission</code>	TCP retransmissions
<code>tcp.analysis.duplicate_ack</code>	TCP duplicate ACKs
<code>tcp.stream eq 0</code>	Show only TCP stream 0

UDP FILTERS

<code>udp.port == 53</code>	DNS traffic (UDP port 53)
<code>udp.port==67 && udp.port==68</code>	DHCP traffic
<code>udp.port == 123</code>	NTP traffic
<code>udp.srcport</code>	UDP source port
<code>udp.dstport == 53</code>	UDP destination port 53

ICMP FILTERS

<code>icmp.type == 8</code>	Echo request (ping)
<code>icmp.type == 0</code>	Echo reply (pong)

HTTP FILTERS

<code>http.request</code>	HTTP requests
<code>http.response</code>	HTTP responses
<code>http.request.method == "GET"</code>	HTTP GET requests
